

Employment program for PhD students in Computer Science Faculty of Mathematics and Physics, Charles University

This opening is intended for PhD students in computer science advised at one of the departments of the Faculty of Mathematics and Physics, Charles University. PhD students are typically employed at a position corresponding to an academic assistant. A separate application for this position, in addition to enrollment in the PhD program, is necessary.

The salary for this position together with the stipend guarantees monthly income 22,500 CZK of which about half is tax exempt. The income can be further increased by participation in projects. In the academic year 2019/20, the typical (median) total monthly income for first year PhD students is 29,500 CZK and it is expected to increase moderately during the second to fourth year of study.

For details please contact the head of your department or Prof. Jiří Sgall <sgall@iuuk.mff.cuni.cz>, Vice-Dean for Computer Science.
